

# Impact Evaluation

## Evaluate new roles in your service

Have you introduced a new role into your service in the last 9-12 months?

Would you like help evaluating the impact of the role?

The Work Based Education Facilitators Network can help. We have developed a tool to help managers systematically work through the introduction of new roles in their service and the potential impacts this has had. The WBEF network will work with you through the process and support you in using the tool.

It will require some commitment on your part in that you will need to gather the evidence to assess the effectiveness of the new role in your service area. This may require you to introduce data collection methods if you do not already have them.

You will need to spend between 1-2 hours in total to fill in the tool and additional 1-2 hours as part of a semi structured interview with one of the WBEF team.

If you would like further information or discuss the tool please send the following details to the e mail address supplied:-
