Workforce Transformation

The role of Health Education England (HEE) is to ensure that the healthcare workforce has the right skills, behaviours and training and is available in the right numbers, to support the delivery of excellent healthcare and drive improvements. HEE supports healthcare providers and clinicians to take greater responsibility for planning and commissioning education and training through 13 Local Education and Training Boards (LETBs) nationally - Health Education North West being the largest.

Transformation of the workforce is an essential component of HEE's vision. In the North West this means;

"Developing a workforce responsive to changes in care, now and in the future"

Health Education North West supports transformation by:

- Ensuring a sufficient supply of highly skilled staff
- Enabling up-skilling of the current workforce
- Developing and promoting new ways of working

This booklet presents existing, new and emerging roles supported by Health Education North West which contribute to workforce transformation.

Pre employment training programme aimed at unemployed adults to support them to move into employment. Four weeks college training with level 1 or 2 qualification, followed by a ten week work placement, which organisations across health and care are encouraged to support. Placements include direct patient care and administration roles. Support is available to the participant during the programme and for 6 months after completion by the Employment Progression Pathway (EPP) team. This team provides assistance with job matching, applications and interview techniques.

What are the benefits?

- Creates future supply for clinical and non-clinical roles
- Increases social mobility of the local community

Funding and Support

Fully co-ordinated and supported programmes. All training costs covered, fund DBS checks and occupational health checks.
